

CORPORATE PROFILE

Ackerman Pharma is a network of associated companies offering a comprehensive, one-stop solution designed to help you reach the market faster while achieving substantial cost savings compared to independent efforts.

We provide a fully turnkey service tailored to your specific requirements—from regulatory approval and logistics to warehousing, private-label packaging, and sales and marketing support. Our experienced in-house regulatory team has successfully handled over 500 products—including new molecules, generics, medical devices, and orphan drug dossiers—streamlining approvals with the Mexican Health Authority (COFEPRIS).

With more than 35 years of presence in Latin America, we bring high-value, niche, and high-technology products to market—especially in the realms of critical care, women’s health, and consumer-facing channels like pharmacies and OTC retail.

Prominent products we’ve supported include INOMax®, ProLacta®, Therakos®, Junimin®, Gynofit (a lactic acid gel medical device for bacterial vaginosis), and AmnioSense (a diagnostic medical device for detecting amniotic fluid leakage).

Partner with Ackerman Pharma to make your business stand out. We are your strategic ally—driving innovation, efficiency, and accelerated market entry.

The Ackerman Advantage

- **Save over USD \$100,000 through integrated services**
- **Use our establishment license to meet regulatory requirements**
- **Avoid costly outside attorneys or full-time chemists for COFEPRIS filings**
- **Secure IP protection with clear contractual safeguards**
- **Coordinate importation, storage, and distribution seamlessly**

Proven Market Entry Process

- 1. Partner Identification – Find the right local partner and entry strategy.**
- 2. Regulatory Hosting – Use Ackerman’s establishment license for compliance.**
- 3. Official Representation – We sign documents and manage COFEPRIS submissions on your behalf.**
- 4. Marketing Authorizations – Our RA specialists handle all requirements and meetings.**
- 5. Import & Quality Control – Manage bulk/finished product import and release testing.**
- 6. Warehousing & Packaging – Store, package, and distribute with GDP compliance.**
- 7. Ownership Protection – Retain full rights to your registrations, formulas, and IP.**

Get-To-Market Faster

Ackerman Pharma is more than a service provider—we are your long-term strategic ally, driving innovation, efficiency, and accelerated market success.

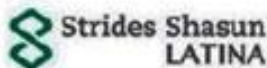

SUCCESS

Building lasting business relationships
